Intelligent 8 Loop Fire Alarm Control Panel

GST-IFP8

Description

The GST-IFP8 is an intelligent fire alarm control panel. Flush-mounted type housing, dual redundant processor technology capable of connecting over 1900 devices, provides the perfect solution for all medium to large systems.

The system is compatible with the complete range of GST Intelligent detectors, sounders, call points, and interfaces, including intrinsically safe and gaseous extinguishing controls. The IFP8 is manufactured and certified to EN54 parts 2 and 4, BS5839 Par 4. And CPD

The GST programming facilities enables advanced and complex cause and effects to be programmed with ease, including phased and cascade evacuation scenarios.

Added commission features such as duplicate address checking, device mismatch, editing device details and programmed through the control panel that has proved to be highly rated by both commissioning and service engineers.

By utilizing the GST protocol the GST-IFP8 can be networked with up to 240 panels, making this the perfect solution for large decentralized systems such as shopping centers, military camps, industrial complexes, holiday villages etc.
